CAREER OBJECTIVE

I am a technology enthusiast software engineering graduate from Addis Ababa Science and Technology University. I have a Strong ability in full-stack web development specializing in front-end with ReactJS, Perfect attention to detail and ability to accomplish designated tasks speedily and professionally starting from requirements elicitation, implementation quality assurance and Deployment.

As software engineering graduate and a web developer I am seeking a position as a Software Engineer or Web developer utilizing my skills in ReactJS, CSS and HTML, Express JS, NodeJS and MongoDB.

EXPERIENCE

Intern Web Developer at Enat Bank

July 2021 – February 2022

- Designed and implemented Currency Conversion, Exchange rate Display Website and Lost and found Items tracking website.

PROJECTS

School Information And Resource Planning

January 2023 - PRESENT

- Developing a full stack website to help elementary schools in Ethiopia to have a better management and handling of resources within the school.

Hahu Cloud | Ethiopia's Web Hosting Service Provider

May 2023

- I challenged my self to replicate HahuCLoud's website and I was able to do it so beautifully and I ended up even adding dark mode to the website which made it look a bit colorful and engaging.
- Here is the github repo link: https://github.com/pinocchio-life-like/hahu_cloud
